- Oil pressing
- Grain milling
- Spray drying

We approach each customer individually. We specialize in comprehensive customer service, starting from understanding their needs, by offering work on product development, developing the necessary documentation, to delivering the final finished product. However, as part of our needs, we are able to deal with each of our clients' areas of activity, which look as follows:

We have many functional and diverse production lines thanks to which our technological capabilities are very wide compared with other manufacturers in the industry. Of course, we constantly put effort in continues improvement as well as plant and equipment development in order to meet the current market trends. Our latest project implementation are coloured softgel capsules.
