

Birch juice with mint leaf infusion

Pasteurised product, without added sugar

The juice is obtained in early spring from the trunks of birch trees and is collected from the first buds on the tree until the leaves develop. It has a light straw colour and the addition of an infusion of mint leaves gives it a refreshing taste. Birch sap is a perfect supplement to the daily diet and can be consumed by people of all ages, including children, without quantitative restrictions. It is worth drinking it especially in the autumn-winter period and during the spring solstice.

It contains naturally occurring sugars.

Ingredients:

Birch trunk juice (Betula pendula) (99.7%), infusion of peppermint leaves (Mentha piperita L.) on birch juice (0.15%), acidity regulator: citric acid.
