

Collaflex

Collaflex contains

Collatrin® which provides components present in the extracellular matrix of the cartilage: type II collagen, chondroitin sulphate and hyaluronic acid. They are present in their hydrolyzed, low molecular weight form which is highly

absorbable from gastrointestinal tract. **Collaflex**

also contains vitamin C. Vitamin C contributes to normal collagen formation for the normal function of cartilage and bones. Moreover, vitamin C contributes to the protection of cells from oxidative stress.

Intended use

Product supplements diet in type II collagen, chondroitin sulphate, hyaluronic acid and vitamin C. It is recommended for people who want to maintain normal cartilage and bones, especially for the elderly and people engaged in intense physical activity.

Recommended use

Adults – 1 capsule twice a day.

Do not exceed the recommended daily dose. Food supplements should not be used as a substitute for a varied and balanced diet. Maintaining normal health requires a varied and balanced diet and a healthy lifestyle.
